

Ms. N. Lamboo: STEM Learning Leader

What is “making”?

- ▶ Creating
- ▶ Using your hands
- ▶ Tinkering
- ▶ Purposeful play
- ▶ Open-ended exploring

What is a “makerspace”?

- ▶ Location where “making” can occur
- ▶ Hands-on
- ▶ Messy/noisy
- ▶ Collaborative, community-based
 - Everybody is an expert and nobody is an expert
- ▶ Variety of tools and materials
- ▶ Technology is incorporated

What does this look like in a school context?

- ▶ Inquiry or project-based
- ▶ Real-world connections
 - Ex: Tying math concepts to carpentry or culinary arts
 - Ex: Mr. Noriega – space shuttle/station
- ▶ Alternate form of expression
 - Kinaesthetic, tactile
 - Ex: cell project
- ▶ Real tools, real problems
 - Design challenge
 - Empathy challenge
- ▶ School examples
 - Egg drop
 - House project
 - Film project

Egg drop

- ▶ Short and sweet
- ▶ Demonstrate understanding of specific concepts
- ▶ Challenge students to think critically and creatively
 - Providing constraints
 - Changing up the problem
- ▶ Collaborative

House project

- ▶ Longer-term in nature
 - Unit long project
- ▶ Personalized to each student
- ▶ Learning was in the process, not the result
- ▶ Skills and knowledge

Film project

- Cross curricular

What does this look like in a school context?

- ▶ Design thinking process → Ideate, create, fail, repeat
 - Developing critical thinking skills
 - Encouraging imagination and creativity
 - Telus Spark – 10,000 ideas
 - The future is uncertain – we need problem solvers
 - Risk taking
 - We learn when we step outside of our comfort zone
 - Cross-curricular
 - STEAM (science, technology, engineering, ART, math)
 - Examples: flowers

UNCERTAINTY / PATTERNS / INSIGHTS

CLARITY / FOCUS

RESEARCH

CONCEPT

PROTOTYPE

DESIGN

The A in STEAM

Pedagogical philosophy

- ▶ Constructivist ideology –
 - We create our own meaning from our experiences
 - Learning by doing
 - Interact with materials, people and knowledge
 - Experience it first-hand
 - Reflection/discussion important
 - Learning occurs in the process

San Francisco: Tinkering School

- ▶ Gever Tully: Life lessons through tinkering
- ▶ Gever Tully: 5 dangerous things you should let your kids do

Goals of SPB Makerspace

- ▶ Offer students an alternate form of expression
- ▶ Teach critical thinking, problem solving, risk taking, creativity, collaboration and resiliency
 - “Success is in the doing, failures are celebrated”
 - “Fail forward”, “Fail positive”
- ▶ Teach students to value the process
 - “Nothing ever turns out as planned” – and that’s a good thing!
- ▶ Allow students to use real tools and technology
 - Link to real world skills in order to solve real world problems
